

# LETTER OPENER LO300

TECHNOLOGICALLY ADVANCED

Make quick work of processing incoming mail with the speedy FP E-Z Opener 300 Mail Opener. It's easy to use, protects mail contents, and doesn't leave behind a pile of paper scraps like other openers.

### Envelope Slitting

The E-Z Opener 300 uses a precise slitting mechanism to cleanly open each envelope as it's fed through the unit. Envelope contents remain intact, yet easily accessible.

### Vertical Feeding

Feeding envelopes vertically allows gravity to ensure that each letter is positioned properly for reliable opening. This feeding system avoids partially opened mail, because partially opened isn't really opened.

### Fast and Flexible

The FP E-Z Opener 300 zips through your mail at up to 300 pieces per minute. And with the ability to handle most types of envelopes, and any thickness up to 3/16" thick, this opener makes quick work of most jobs.

Customer service is an important feature of every FP product. Whenever you have questions, we'll find the answers for you. It's part of what makes FP the right choice for your mailroom.
