

## How to repair a rip in the ribbon without opening the housing of the cassette

1. Cut a label into halves.

2. Remove the paper and expose the adhesive surface for approx. 1 cm

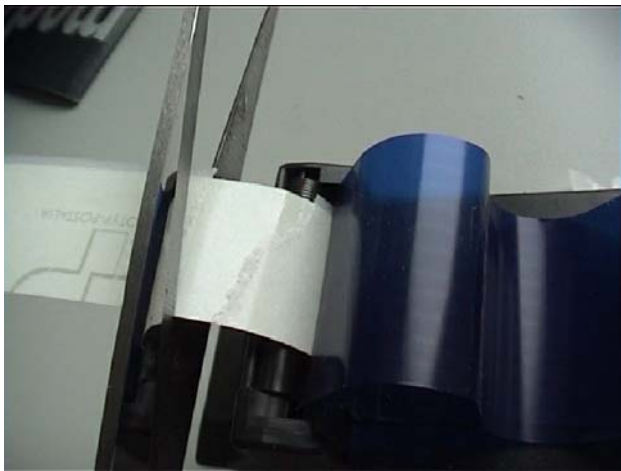

3. Please use a paper clip to press open the see-saw and move the label to the up winding roller until it sticks to the ribbon.

4. Remove the paper and expose the adhesive surface on the other side for approx. 1 cm

5. Cut the rest of the label and glue the ribbon.

6. Please tighten the ribbon with the up winding roller and the repair of the ribbon is finished.
